

# DRILLING & COUNTERSINKING

**WPW Tailor Made Solutions**  
For decking and other joinery exterior and interior applications.

## PROBLEM

Cracking / splitting when using screws to join wood!

## SOLUTION

Pre-drill pilot hole, clearance hole and countersink.

Use WPW Countersink & Stop system, for a long lasting perfect joint.

# WPW – A leading manufacturer of professional quality cutting tools.

## WPW main product lines

### DRILLING & COUNTERSINKING BITS

Professional adjustable countersinks, counterbores, plug cutters, hinge-boring bits and other drilling accessories. Innovative solutions for joining wood with screws. User-friendly tool designs enable easy control of the holes depth, the drill length and its replacement. Most of the tools are carbide tipped – suitable to work on hard materials. The tools are designed to work with drill press, hand held drills and portable drills. We offer tools with both round shank and with 1/4" (6.3mm) HEX shank for Quick-change systems.

### PROFESSIONAL ROUTER BITS

A comprehensive range of industrial quality Router Bits – Tungsten carbide tipped, solid carbide and replaceable carbide. This range is the best choice when the quality of the cut and long tool life are the primary factors. It should satisfy most demanding applications in manufacturing and in the woodworking trade.

### WOODPECKER LINE

Economical line of quality carbide tipped router bits and other tools essential for every craftsman and DIY amateur. A basic assortment of more than 100 router bits and sets. The tools facilitate renovations, repairs and restoration of furniture. Excellent for building furniture and artistry on wood.
